EU Policy Symposium 1
EANM Policy & Regulatory Affairs
Tuesday, September 12, 15:00 – 16.30

Session Title
Supply & Shortages of Radiopharmaceuticals

Chairpersons
Wim Oyen (Netherlands)

Programme
15:00 – 15:05  Introduction by the Chair

15:05 – 15:10  Orazio Schillaci, Italian Ministry of Health (invited)

15:10 – 15:20  Remigiusz Baranczyk, Head of Sector, Euratom Supply Agency - ESA activities to support the secure supply of medical radioisotopes in the EU.

15:20 – 15:30  Ronald Schram, Director Strategic Alliance, NRG/PALLAS - PALLAS-reactor to secure the production of medical isotopes in future.

15:30 – 15:40  Thierry Stora, Senior Physicist, CERN - PRISMAP, the European medical radionuclide programme: non-conventional radionuclides all the way to the clinical validation?

15:40 – 15.50  Nuclear Medicine Europe

15:50 – 16.00  Michel Koole, EANM Scientific Liaison Officer – the medical needs.

16:00 – 16:30  Panel discussion and Q&A session

Summary
- Discussing Europe’s needs to ensure its independence for the production and supply of medical isotopes;
- Highlighting the need for a European strategy to ensure sufficient production of radioisotopes;
- Discussing potential solutions to facilitate delivery to patients and strengthening communication with end users.

Educational Objectives
- Discussing Europe’s needs to ensure its independence for the production and supply of medical isotopes;
- Highlighting the need for a European strategy to ensure sufficient production of radioisotopes;
- Discussing potential solutions to facilitate delivery to patients and strengthening communication with end users.

Key Words
Radiopharmaceuticals; Supply Chain; Shortages; Policy
