

Learn & Improve Professional Skills (LIPS) Track – Session 1

Oncology & Theranostics Committee

Sunday, September 10, 08:00 – 09.30

Session Title

Novelties in Radionuclide Therapy

Chairpersons

Liliana Violante (Porto, Portugal)

Programme

08:00 - 08:30 **Lena Unterrainer** (Munich, Germany / Los Angeles, USA): Emerging radiopharmaceuticals in radionuclide therapy

08:30 - 09:00 **Arthur Braat** (Utrecht, The Netherlands): Intra-arterial Peptide Receptor Radionuclide Therapy

09:00 - 09:30 **Zarni Win** (London, UK): Pancreatic cancer treatment with P-32

Educational Objectives

1. Update of knowledge on radionuclide therapy
2. To become aware of new treatment possibilities
3. Updating knowledge to improve outcomes

Summary

Radionuclide therapy has increasingly assumed an important role in Oncology. In this session we take radiometabolic therapy future in consideration by giving a particular emphasis on emerging radiopharmaceuticals, on the new approach to PRRT and P-32 application on pancreatic cancer treatment. This session intends to amplify knowledge in order to improve outcomes.

Key Words

Radionuclide therapy, emerging tracers, PRRT, Pancreatic cancer, trials
